RE: Randal Winter Construction

To whom it may concern,

We have used Randal Winter Construction Company as our general contractor for a commercial business building improvement project that required both the management of a number of sub-contractors used for their specific specialties, approval and permitting of a complex project and RWC's specific talents in general construction, electrical and plumbing work. Their expertise in the various aspects of this project resulted in a commercial facility with high stack and refrigerated storage, a laboratory, shipping and packaging areas and the completion of the entire project in the time expected.

We are completely satisfied with the quality of work that was done and with all of the contractor's employees who worked on our site. Projections of costs were accurate, and the company worked with us effectively as plan changes were required.

It is with pleasure that I write this letter and recommend Randal Winter Construction for industrial projects requiring careful oversight and project management and where complexity outside of standard contracting work is required for successful completion of the project.

With best regards,

A handwritten signature in black ink, appearing to read "Kevin Liddle".
